

JAN ELIZER I. DE JOYA

Dolores, Quezon, Philippines | 09567966221 | janelizerdejoya@gmail.com

EXPERIENCE

Quality Assurance Intern

January 2026 – April 2026

Company-based Internship

- Executed systematic testing of company systems against client requirements, identifying defects early and ensuring all deliverables met quality standards before release.
- Organized and maintained test results and project data in structured spreadsheets, enabling the team to track issues efficiently and resolve them on time.
- Documented and communicated findings through written reports to the development team, resulting in clearer issue resolution and faster project turnaround.

Freelance Project Developer

March 2025 – Present

Remote | Self-Employed

- Managed end-to-end delivery of IT projects for student clients by handling requirements, timelines, and file organization, resulting in consistent on-time project completion.
- Coordinated client communication and task tracking independently in a remote setup, ensuring client expectations were met throughout each project.
- Executed programming and IT tasks across multiple concurrent projects, building a reliable reputation that led to repeat client engagements.

Capstone Project Lead & Developer – CrimeWise

April 2025 – January 2026

Online Forensic Examination System | LSPU – San Pablo City Campus

- Led the design and development of an AI-powered examination system for handwriting and signature analysis, enabling CCJE students to undergo automated forensic assessments.
- Conducted structured research and data collection on forensic document examination, producing accurate system content that aligned with academic course requirements.
- Built and managed a PostgreSQL database for user records, data inputs, and grading logic, resulting in a fully functional and scalable examination platform.

EDUCATION

Bachelor of Science in Information Technology

2022 – Present

Laguna State Polytechnic University – San Pablo City Campus | Major in Web and Mobile Development

Science, Technology, Engineering and Mathematics (STEM)

2020 – 2022

Dagatan National High School
